เครื่องเชื่อมพลาสม่า Plasmatron Welding

Plasmatron Welding: It is different from Conventional Plasma Welding

Advantaged of Plasmatron welding

- Absolutely no spatter
- Good clean root penetration
- No thermal stress on the welding torch
- No need additional shielding gas
- Ductile, file grained structure = good resistant load
- Weldable Materials... sintering material, stainless, Aluminum
 Copper, case hardened steel, nitrified-hardened steel, high alloy cobalt steel High strength steel, elo-galvanized sheet with CuSi3-plumb
- Good for thin and thick sheets applicable
